

Antenna replacement at the "Kitzbüheler Horn", Austria

So that after more than 30 years of operation of the KATHREIN FM transmission antenna system at the 1964 meter high transmitter location "Kitzbüheler Horn" in Tyrol, Austria, the radio programs can also be transmitted just as reliably and in the best quality in the future, and as part of the regular revision work by the transmitter operator ORS, the FM antenna radiators have been replaced.

KATHREIN project manager Anton Vogl, together with the riggers from the installation company Reiter Antennenbau, is pleased to hand over a functional system to the ORS team for the next few decades.
