

The Scala CL-900B broadband log-periodic antenna is intended for use in professional fixed-station applications.

- The radiating system is protected by a rugged fiberglass radome to assure reliable and stable operation in heavy icing conditions.
- High front-to-back ratio and absence of sidelobes can help to minimize co-channel interferences at sites with congested spectrum.
- Superior electrical specifications including low VSWR, wide bandwidth, flat frequency response and superb intermodulation performance.
