

New KATHREIN FM transmission antenna in "Buraimi", Oman Commissioning of an FM Antenna and Combiner

Rohrdorf, 8th June 2020

by: Anton Vogl, KATHREIN Broadcast GmbH

In January 2020, the radio mast in "Buraimi" in the Sultanate of Oman received two new Kathrein FM antennas and one FM 6-channel combiner. Delivery, execution, installation, cooperation with the customer on site and, finally commissioning, went completely smoothly thanks to the professional pre-planning by the Kathrein engineers. Anton Vogl and Bernhard Doll from Kathrein were at the transmitter site for the measurement and acceptance test of the FM system in "Buraimi", which is now broadcasting 6 FM programs in highest quality.
